

# Eco home decorating

Give your home a modern make-over with the latest New Look Eco Energy palette of colours. These are colour ideas that work. Here's how.

Paint Place recently released the New Look Eco Energy colour collection, three handpicked colour stories that capture the mood of the moment, all tie in with Australian lifestyles and serve to make our homes lovelier and more fashionable.

The most successful, harmonious and livable colour schemes keep the more muted neutral colours on walls and paint the bold, stronger shades on feature walls and on huge painted canvases placed on feature walls, it's easy colour layering.

**Wheatfield** Great if your home already has a cream/tan/grey furnishings.

**Try:** New Look Permafrost on walls and ceiling. Silkpetal or Grainseed as feature walls with Duststorm as an accent in the entrance hallway or as a canvas on the feature walls.

The mood of the moment is clear, it centres on about being environmentally sensitive and leading a more organic way of life. Each New Look story has a touch of green, to allow this most soothing of colours to translate onto walls. Each of the colour stories will tie in with your home's existing furnishings.

New Look paints are tinted with the new Wattyl EcoTint colourant which is certified by the Good Environmental Choice of Australia for its low environmental impact.
